

Behringer
Hang Mount Stanchion
STCHNHM

Hanger Stanchion with square round tube cut to specified length. One end of the tube has a capped end with a rod hole. The rod hole is used for telescopic adjustment of the hanger rod. Specify the steel finish and the finish on the weld.

Features: Hole in capped end of tube allows the hanger rod to be manually adjusted for telescopic location of the tube or pipe.

Hardware: 304 stainless steel: 316 stainless steel, carbon steel & zinc plated carbon steel

Finish: Mill = Fabricated steel and welds are a mill finish
Buff = Fabricated steel and welds are buffed to remove splatter
BLND = Fabricated steel is polished and welds are blended
Special finishes and painted stanchions are available, call Behringer
