

## FNW

For more than 50 years, FNW has delivered quality and reliability in valve technology. FNW manufactures valves to the applicable industry standards so you can have total confidence in your industrial applications.

### KNIFE GATE VALVES

- Stainless and carbon steel
- Sizes from 2" to 24" with larger available upon request
- Resilient or metal seated
- Unidirectional or bidirectional shutoff
- Additional options and accessories

### BUTTERFLY VALVES

- High performance and resilient seated
- Bidirectional shutoff
- Optional body and seat materials to meet your requirements

### BALL VALVES

- Stainless and carbon steel
- Flanged, socket weld or threaded
- Size from 1/4" to 8" to meet your specifications
- 2- and 3-piece body designs
- Standard locking lever available on most models

### ACTUATION & ACCESSORIES

Valves don't operate in a vacuum. FNW offers everything you need to operate smoothly, including:

- Mounting kits
- Controls
- Valve modification
- Custom fabrication

# CUTTING-EDGE VALVE AUTOMATION

---

Ferguson Industrial valve automation services keep your facility running safely and efficiently.

We specialize in service. With 20 valve centers run by experienced technicians, we're ready to fulfill all your automation needs. Whether you need retrofitting, repairs or replacements, we're your total valve solution.

Our experts provide engineering for a range of applications:

- On/Off
- Modulating control
- Fail safe
- Block
- Diverting

And we have the inventory to assist you with almost every application:

- Electric
- Pneumatic
- Hydraulic
- Quarter and multi turn
- Linear
- Electro-hydraulic

## ACCOUNTABILITY MATTERS

That's why we document, photograph and tag each valve assembly individually. We also test and calibrate every valve package before they leave our facilities. Why?

**Because total accountability on our end means total confidence on yours.**
