

NONMETALLIC SUPPORT/HANGING SYSTEM FOR THERMOPLASTIC PIPE

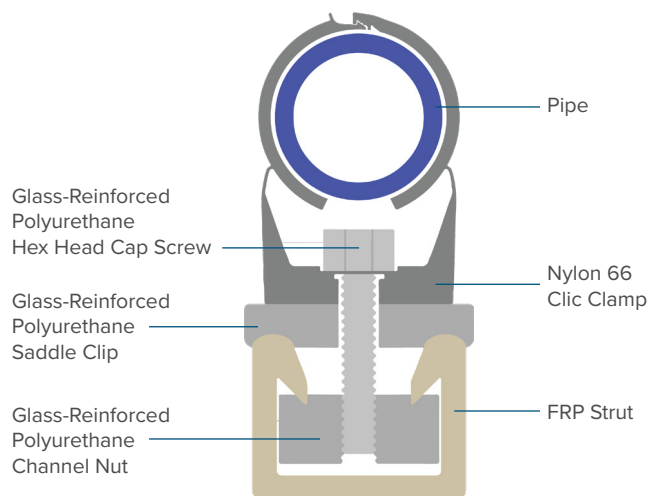

Corrosion-resistant pipe deserves corrosion-resistant support. Our offering of Industrial Thermoplastic products includes an engineered, nonmetallic strut/clamping/hanging pipe support system.

PROBLEM

Corroding metal supports can jeopardize the performance and useful life of thermoplastic piping systems.

SOLUTION

Our nonmetallic option offers corrosion resistance while maintaining proper support at every point in the system.

FRP Strut – Maximum Column Load at 60"
Span = 1,047 lbs. with 3:1 Safety Factor

Polyurethane Fasteners – Minimum Thread Shear
Load = 250 lbs. with 3:1 Safety Factor

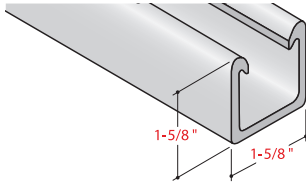

FEATURES AND BENEFITS

- Design follows manufacturer's best practices
- Clamps provide full support
- Mounts in any orientation
- Handles maximum stress load of pipe restraints
- 100% UV resistant
- 100% corrosion resistant
- Reduced friction between support and pipe compared to metallic options
