OUR BRAND

FNW traces its roots to Familian Northwest, established in Portland, Oregon in 1969. In the late '70s, some industrious sales associates, responding to a demand from the pulp and paper industry, developed the first all-cast stainless steel knife gate valve in the country. The FNW brand was established in 1979, on the foundation of that valve product.

Since these beginnings, customer demand required that FNW expand into other products such as ball, butterfly, knife gate, gate, globe and check valves. Even today, we continue to add additional products to our offering such as flexible connectors, gauges and hangers.

Your bottom line depends on the predictability, performance and longevity of the products used in your operations. FNW manufactures superior products that meet industry standards and your expectations.

1

QUALITY

FNW products are held to a high standard of quality that conform to specified requirements.

2

DIVERSIFICATION

FNW offers a diverse portfolio of valve products to meet a wide range of applications and needs.

3

CONSISTENCY

FNW is proud to offer an extensive selection of safe and reliable products that customers around the world count on each and every day.

4

TRUST

For five decades, FNW has provided customers like yourself with dependable products. Every product we create is done so with the trust of our customers in mind.
